RE: Site Inspection, Earl Gross, ML44152, S/047/047, and Golden Rule, S/047/037, Uintah County, Utah

Inspection Date: August 21, 1991  
Inspection Time: 1840-1920  
Conditions: Partly cloudy, warm  
Participants: Tony Gallegos, DOGM

The purpose of this inspection was to evaluate the condition of these sites which are in the same general vicinity and under the same operator.

I attempted to access the S/047/047 site via the road near Stewart Lake. This road passes through several parcels of private property with locked gates. This route was unsuccessful. The other access route is to take highway 40 south out of Naples and head east onto the road (located approximately two miles north of the bridge across the Green River).

I was unable to clearly identify either of these two sites while in the vicinity. Several disturbances exist in this area, but only one appeared to be active. After inspecting this active site it was found that the operator of this site was not Earl Gross although it is unclear whether or not he is involved at all in this site. Another inspection of this area should be made to clearly identify responsibility of the various disturbances.
